

# PROSECURAL® S 2010

## Add-on window

**PROSECURAL® S 2010 is fitted with PC 1804 high-efficiency polycarbonate glazing. This polycarbonate is the most highly impactresistant synthetic material that is currently available on the market – classified as A3 under DIN 52 290, as P5A under EN 356, and as Class EH 02 under VdS Guidelines. The scratch-proof surface, abrasion resistance properties and outstanding transparency make it the leading product for security glazing purposes.**

The PROSECURAL® S 2010 add-on window system has convincingly proved its worth in warding off risks through vandalism or burglary in both the commercial and private sphere. Numerous references confirm its effective and successful application even in the face of explosive attacks. Not least for these reasons, the system is recommended by police security advisers and is even specified for certain buildings by property insurers.

One of the key features are the special frame sections, which have been specifically developed by HAVERKAMP. These give the PROSECURAL® S 2010 a visually attractive but at the same time unobtrusive design. All the construction details such as screw connections and angle brackets are concealed by the specially developed profile.

The design of the system therefore fits in harmoniously in any architectural environment and without being conspicuous as a security element. The new special profile sections also mean that the frame no longer has to be secured by ties.

The frame sections are available in white, alu matt silver and all RAL colour shades. The frame can be mounted easily and unobtrusively on all window constructions, and is highly effective without drawing attention to itself.

PROSECURAL® S 2010 provides unobtrusive indoor protection from attacks from outside. For the perpetrator, this security system cannot be seen. If the original window is smashed – with substantial splintering – the add-on window provides a further level of security.

The information of this datasheet is based upon longtime practical experience and relies on the current state of knowledge and technology. The buyer still has the duty to test our products for the fitness for use. Beyond that our terms and conditions shall apply.

With the release of a new datasheet the previous data loose their validity.
