HAVERKAMP
Paint Protection Film

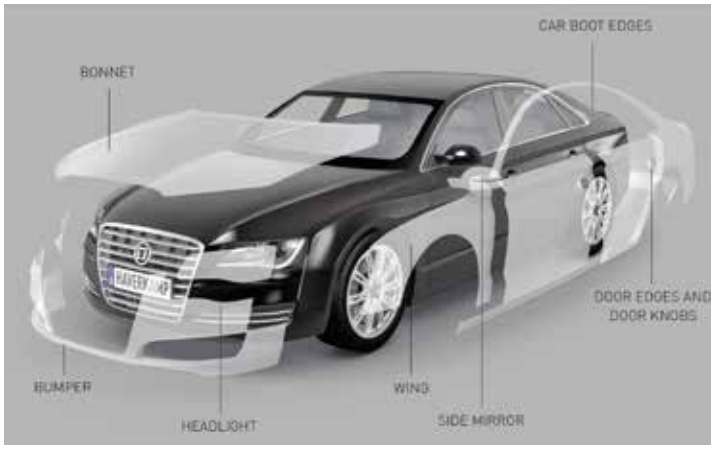
HAVERKAMP

The #glassoptimizer

- most innovative film developments
- unique product range
- latest manufacturing techniques
- best national and international references

At a glance:

- extremely scratch-insensitive surface coating to protect against paint scratches and stone chips
- self-healing properties activated at higher temperatures
- simple bonding
- can be removed without residue
- long-term transparency
- scratch insensitive | maintenance-free
- high performance / high gloss / transparent - crystal clear
- subsequent installation on complex moulds possible due to good handling behaviour



HAVERKAMP paint protection films are special, heavy-duty films for protecting painted surfaces on all types of vehicles. All painted car parts can be subsequently protected from scratches, paint cracks and stone chips with HAVERKAMP paint protection films.

They are resistant to washing, UV and weathering. The special surface protects against yellowing. Due to their flexibility, HAVERKAMP paint protection films are very easy to apply to surfaces and can be removed without leaving any residue.
